# TRELLEBORG RUBBER LINING

Trelleborg offer a complete range of rubber sheet in various widths, thickness's and hardness's to suit a multitude of applications for mining and mineral processing.

## TRELLEBORG RUBBER LINING

Trelleborg offer a complete range of rubber sheet in various widths, thickness's and hardness's to suit a multitude of applications for mining and mineral processing.

For technical data on our rubber sheets please refer to the rubber sheet for the mining industry brochure.

Trelleborg offer lining services from our Perth and Brisbane workshops.

We also offer project management for small to medium size rubber lining projects coordinating fabrication, rubber lining and painting.

Equipment lined includes:

- Launderers
- Spools
- Pipes
- Chutes
- Agitation shafts
- Vessels
- Screen components
- Pulleys
- Trunnions
- Trommel frames.

## RUBBER ADHESION PROCESS

We provide our customers with the flexibility to select and consider two methods of bonding rubber to steel surfaces. Cold bonding using contact adhesives or hot vulcanisation of uncured rubber using autoclave pressure steam curing techniques.

Both our rubber lining workshops in Perth and Brisbane are fully equipped to offer both methods of lining.

Our application engineers are available to help you decide upon the optimum lining method for your application and process duty.

## RUBBER LINED PRODUCTS APPLICATION GALLERY

Trelleborg is a world leader in engineered polymer solutions that seal, damp and protect critical applications in demanding environments. Its innovative solutions accelerate performance for customers in a sustainable way.
