

Innovative Solutions for Solar Energy

Wherever you find renewable energy you'll find our innovative seal, damp and protection solutions. With more than 100 years in the polymer industry it is safe to say that we know, live and love the material. We provide a wide range of advanced and customized solutions that seal, damp and protect critical applications. Our broad Trelleborg network ensures that you will find us close by, no matter where you are.

Our mission: Reliable solutions for your business

We work closely together with OEM customers and provide everything from in-house compound development to profile design assistance and modern production techniques as well as additional post production services. We are equipped to serve Your need for performance and stability.

Engineering expertise and new ways of thinking

You can benefit from our open testing philosophy that challenges known solutions. A divers application expertise combined with decades of experience in innovation support your solutions meeting test norms and approved certifications.

We:

- Offer engineering support
- Have inhouse compound development and profile design centers
- Manufacture multiple compound extrusion of EPDM, TPE, NR, SBR, VAMAC® , ECO, NBR/PVC, CR, HNBR, Silicone to mention a few
- Are certified according to ISO/TS 16949, ISO9001 and ISO14001

Application ares:

- Solar systems: electric, photosynthesis and water based
- Roof integrated solar systems
- Wall integrated solar systems
- Solar-thermal collectors
- Solar absorbers
- Application accessories

Accelerating performance
